August 8 Agenda

9:00 AM - 10:00 AM: Check-in & Coffee

- Check-in and grab coffee and/or snacks
- Meet the instructors & advisors
- Meet other cannabis business owners

10:00 AM - 12:00 PM: Breakout Tracks

You can select one of two specialized tracks: Retail or Manufacturing (Cultivation & Processing). Each track includes live instruction from industry advisors and experts in an open office hour setting to review your business plans, answer questions, and more.

Front-End Retail Track (60 Spots)

This track should focus on the requirements for establishing and operating a compliant and successful dispensary:

- Licensing and Compliance: Navigating the application process, securing licenses, and understanding ongoing regulatory requirements. This includes state-mandated seed-to-sale reporting and inventory tracking systems (METRC).
- Location and Build-Out: Selecting a compliant location considering zoning laws (distance from schools, parks, etc.) and municipal regulations. Understanding the costs associated with leasing or buying property and the build-out process, which can range significantly (\$350,000 to \$3,500,000+).
- **Dispensary Layout and Operations:** Choosing an appropriate store layout model (e.g., Bank, Pharmacy, Mobile, Kiosk) based on workflow, customer experience goals, and state regulations. Developing Standard Operating Procedures (SOPs) for daily operations.
- Human Resources: The backbone of your organization, expertly managing hiring, onboarding, training, and payroll. This vital function enhances the experience for both employees and the business, ensuring both thrive together.
- **Product Sourcing and Inventory Management:** Establishing relationships with licensed suppliers, determining product mix (flower, concentrates, edibles, etc.), considering profit margins, and managing inventory to avoid expiration or compliance issues. Utilizing Point of Sale (POS) systems integrated with state tracking systems for accurate, real-time inventory management and record-keeping.
- IT Technology and Security: Implementing robust POS systems for sales, customer data management, and compliance reporting. Setting up required security measures like cameras and alarms.

Cultivation/Processing/Manufacturing Track (60spots) (Panel will be announced shortly)

This track should cover the operational and regulatory aspects of producing cannabis products:

- Licensing and Regulations: Understanding the specific licenses required for cultivation, processing, manufacturing, and testing, and adhering to stringent state regulations.
- Seed-to-Sale Tracking: Implementing and managing systems (often integrating with state platforms like METRC via API) to track products meticulously through every stage of the supply chain, from cultivation to final sale.
- Standard Operating Procedures (SOPs): Developing detailed written SOPs for all processes, including cultivation techniques, extraction methods, manufacturing protocols, quality control, and waste disposal.
- Compliance Documentation and Reporting: Maintaining rigorous records for inventory reconciliation, transport manifests, product testing results, waste disposal, and tax reporting. Documentation is crucial for compliance audits.
- Quality Control and Testing: Establishing protocols for regular product testing, label verification, inventory audits, and potential recall procedures to ensure product safety and accuracy.
- **Technology and Innovation:** Exploring advancements in cultivation tools, extraction techniques, and manufacturing processes. Understanding software solutions for managing operations and compliance.

August 8 Agenda

12:00 PM - 1:00 PM: LUNCH

- Buffet lunch will be supplied as part of your admission.
- Get an overview of Minnesota-specific updates heading into the market opening.

1:00 PM - 2:30 PM: Three (3) x 25-Minute Q/A Breakout Sessions

Three 25-minute, instructor/expert-led breakouts will allow future cannabis business owners to ask questions in a group setting.

- Attendees can set up an agenda once registration is open.
- Banking/Funding, Payments, Onsite ATMs
- HR Focused: Onboarding, Payroll, Documentation
- IT, Security & Risk, Procurement
- Buildouts, Real Estate, Rebates (Project Management)
- Transportation & Delivery
- Insurance, Legal & Compliance
- Cultivation & Manufacturing
- Packaging for Cannabis and low-dose hemp Oct 1 changes
- Real Estate / Zoning, Licenses
- The Green Path: Native Tribes & the Future of Cannabis

2:30 PM: Business Networking Chill Down

Join us to connect with members of the Minnesota Cannabis Business Community. Since there will be a welcoming event hosted by another group later in the evening, we will hold this networking session at an off-site location from 3 PM until nighttime events for attendees to mingle and network with friends from across the nation, as well as some familiar faces from the instate community. **And yes, we've heard the question—will there be samples?** We are collaborating with some event partners and THC/low-dose friendly vendors to arrange something special. Don't worry; the venue is conveniently located near both the expo center and your hotels. For additional information, please reach out to the event planner at info@carpfishcreative.com.

Reminder: Vendors will begin setup at 12:00 PM CST on August 8th

INTERESTING IN INCREASING YOUR BRAND? Reach out as we are not charging vendors for this

Reach out as we are not charging vendors for this portion. We have friends already, but want to showcase brands at the events outside the RiverCentre to showcase a bit of what's going down in St. Paul Cannabis/low-dose scene.

Reach out to info@carpfishcreative.com!
